Dear Dr. Cagen,

Thank you very much for your kind offer, which we have internally discussed.
Unfortunately based on our internal workload and priorities, at the moment there are no resources available to follow up or support the project in Shanghai.

Kind regards

Gerhard Gans

Dear Dr. Gans:

This note is a follow up to a telephone message I left with you last week and follows a brief discussion I had with your colleague Bill Toland a short while ago (at an ACC Science Policy Team meeting) regarding a rather large program in Shanghai, China that is designed to evaluate benzene toxicity in the Shanghai community.

SHELL-MCCLURG-067730

I would like to discuss this program with you as soon as our schedules allow, with the purpose of setting up a presentation from the study sponsors to you and others at BASF who might be interested in this emerging program.

Please let me know your interest and availability.

Thanks

Stuart
