respirator program, qualitative and/or quantitative fit tests, and a physician's statement on whether or not the worker is physically fit to wear the respirator while performing the designated work assignment. The complete specific legal requirements for the selection, use, and maintenance of respirators as well as guidelines for establishing a respirator program are outlined in OSHA's General Industry Standards 29 CFR Part 1910.134 and 30 CFR 11 which incorporates the American National Standard Practices for Respiratory Protection in the ANSI Standard Z88.2-1980.

Sincerely,

Timothy J. Fiorilli
