SUBJ: DOSIMETER RECOMMENDATION

Based on currently available dosimeters, I would recommend you purchase the DuPont MARK-2. A spec sheet is enclosed. It has much of the capability of a Metrosonics package, and can also be used as a sound level meter with Type 2A accuracy.

LCCP has been using the first generation MARK-I, and has had good performance. The MARK-2 sells for approximately \$1,025.00 per unit. As we discussed, it would be best to be consistent on what each plant buys so that if equipment is loaned plant to plant fewer problems in use would occur.
