C.B. Hunt Said

Hydrocarbons - plans are to put them in H.C. Accumulation
& Disposal Project - 1975

Hydrocarbon Emission Control PROJECT.
Jack Miller Said, chlorinated H.C. comes off with C₁₂ and is removed as Gunk in Strainer - Project now approved to transfer to H.C. for disposal with other chlorinated Hydrocarbons.

Lead

- to Settling basin - All mat. removed from basin to go to Land fill - Present Plans.

Miller Said.

Presently goes out thru drain line from 1st Fl. C.R. to Ravine between H.C. & Soda. Ravine discharges into chlorinated lagoon.

Asbestos

- prob. Should Check for Asbestos in Affluent -
Although No EPA Stds.

"

- Should be handled & handled safely as Land fill ? if this is really being done.

Miller Said: Asbestos removed from Cathode during Washing process on 1st Fl. Cathode in Vertical position with overflow into denasty dumpster. D.D. Has holes in bottom - Small amt of Asbestos may go thru. with water - Holes plug and some asbestos is entrained with overflow water out the Cathode. When goes thru trap and go to Ravine. Asbestos remaining in D.D. is prob 3'4" in depth. D.D. is in compact.

Hunt handled Ver Sar Inc. Letter Low Key.

Hunt - Said now Sinking Hydrocarbon to per-Tri as fuel.

" we Should look at plastic Membrane to replace Asbestos ^{as such is} further down

" though we were in pretty good shape
