Gentlemen:

This is to certify that the Bestwall Gypsum Company manufactures gypsum products under the Johns-Manville label to the same specifications as those for Bestwall labeled material.

As such, Johns-Manville gypsum products (as manufactured by Bestwall) when used in construction will give the same performance as Bestwall materials, all details of erection being equal. This applies to fire resistance, sound transmittance characteristics, etc., as well as structural strength.

Very truly yours,

A. L. Mayer
Merchandise Manager
