

IN REPLYING ADDRESS
THE DIRECTOR
NATIONAL INSTITUTE OF HEALTH

U. S. PUBLIC HEALTH SERVICE

NATIONAL INSTITUTE OF HEALTH

WASHINGTON, D. C.

July 31, 1940

Dr. Robert A. Kehoe
Laboratory of Applied Physiology
University of Cincinnati
Eden Avenue
Cincinnati, Ohio

Dear Dr. Kehoe:

This will acknowledge receipt of your letter of July 25, 1940, in which you ask for a date which is mutually convenient to discuss certain matters pertaining to tetraethyl lead.

As far as I know now, I shall be available during the week of August 12. Dr. P. A. Neal, Acting Chief of the Division of Industrial Hygiene, has replaced Dr. Sayers who was recently made Director of the U. S. Bureau of Mines; and I suggest that you keep Dr. Neal informed of matters which have hygienic significance in this connection.

If for any reason I should be absent when you come to Washington, I am sure Dr. Neal will be available to discuss this matter with you.

With kindest personal regards, I am

Sincerely yours,

L. R. Thompson, Director
National Institute of Health
