The CMA PCB Task Force and environmentalists from Environmental Defense Fund joined the electric utility trade association, Edison Electric Institute, in discussions regarding a consent decree to resolve recent EDF challenges to the current PCB electrical equipment rule (August 25, 1982 rule). Significant progress was made this week. All parties agreed to ask the D.C. Circuit Court for a 60-day time extension (beyond June 17) to attempt to work out details for a total agreement to resolve the electrical rule issue.
