

Western Blower Company

Main Office and Plant: 1800 Airport Way, Seattle 4, Washington

Sales Offices in the Principal Cities West of Rocky Mountains

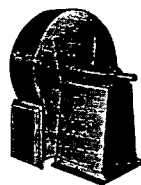

Turbine
Multiblade Fans

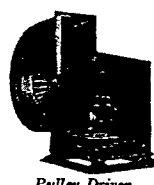

Turbine Multiblade Fans—forward curved blade, Type TR, or backward curved blade, Type "S," fans for heating, ventilating, mechanical draft, etc. *Bulletins No. 30 and 31.*

Mill Exhausters—single or double for material conveying exhaust systems, direct connected or V-belt driven. *Bulletin No. 32-3.*

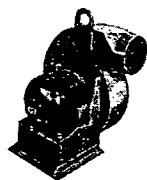

Pulley Driven Utility Sets—V-belt driven, slow speed, quiet operating, for general utility duct ventilating systems. *Bulletin No. 31.*

Mill Exhausters

Pulley Driven
Utility Sets

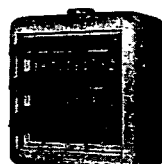

RB Volume
And Pressure Fans

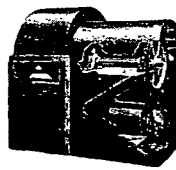

RB Volume And Pressure Fans—radial blade type either direct connected or V-belt driven for ventilating and conveying applications. *Bulletin No. 39A.*

Western Unit Heaters—vertical or horizontal, for general heating and drying applications. *Bulletin No. 53.*

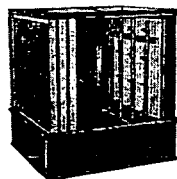

Centrifugal Exhaust Fans Series 59—for general exhaust systems. Complete packaged units. *Bulletin No. 59.*

Western Unit Heaters

Centrifugal
Exhaust Fans

Air Washers

Air Washers—for cleaning, cooling, humidifying and dehumidifying. *Bulletin No. 30.*

Volume Heaters—with one or more centrifugal fans for heating, ventilating and air conditioning. Available in vertical or horizontal cabinet units. *Bulletin No. 70.*

Spirovane Propeller Fans—furnished either direct connected or V-belt driven for commercial or industrial ventilation. *Bulletin No. 50.*

Olympic Heat Exchangers—Converters, Side Arm Heaters, Immersion Heaters, Oil Heaters, and Condensate Coolers.

Bulletins as listed above furnished upon request

Westinghouse Electric Corporation Sturtevant Division

Heating, Ventilating, Dust Control and Fume Removal Equipment, Electronic Air Cleaners, Mechanical Draft Equipment

AIR HANDLING PRODUCTS

Centrifugal Fans—General purpose and Heavy Duty centrifugal fans are highly effective in both commercial and industrial service. Capacities up to 480,000 cfm and pressures up to 32 in. w.g.

Axiflo Fans—V-belt driven or direct connected: Designed to provide low cost fume and vapor exhaust and air supply with new high efficiencies. Easily installed in ductwork. Vaneaxial, Tubeaxial and Spraybooth types available for wide range of applications in all industrial fields.

Ventilating Sets—Series 900: direct connected units for maximum efficiency at popular motor speeds. Manufactured in six sizes up to 3200 cfm. Series 1000: compact V-Belt driven units for large capacity and quiet operation. Twelve sizes up to 14,400 cfm.

Air Handling Combination Units—Air Conditioning, Heating and Ventilating, Ventilating and Sprayed Coil Types:—Factory-built, unitary assemblies. Horizontal and Vertical. Capacities to 48,500 cfm.

HEAT TRANSFER PRODUCTS

Heat Transfer Surfaces—Sturtevant cooling and heating coils are available for Freon, chilled or hot water and steam. Steam coils are of standard, heavy duty, and steam-distributing types.

Air Blenders—For year 'round Heating, Ventilating, Ventilation Cooling and Air Conditioning of schoolrooms and offices. Blends conditioned air from a central system with recirculated room air.

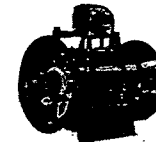

Surface Dehumidifiers—For central plant air conditioning, these sprayed coil units are available with chilled water or direct expansion coils. Capacities to 115 tons of refrigeration and 45,000 cfm.

UNIT HEATERS

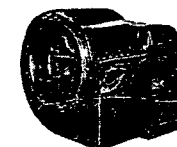

Industrial Heaters—For heating of manufacturing areas, warehouses, garages and general industrial and commercial buildings. Also for continuous duty heating in industrial processes and steel, paper and rubber manufacturing. Capacities to 2,500,000 Btuh and 25,000 cfm. **Cabinet and Propeller Fan Heaters**—Available for steam, hot water and gas-fired applications in horizontal and downblast models. Capacities range from 15,200 to 684,000 Btuh.
