For protection that lasts

NOW! a self-cleaning
HOUSE PAINT
developed by
DU PONT

1. Paint protects the home front

If you want to take care of your house, take care what paint you buy for it! Buy paint that gives *protection* as well as beauty—such as Du Pont House Paint. Du Pont House Paint forms a beautiful, durable film—protects the surface against decay, rust, and rot.

2. Keeps white houses white

Du Pont House Paint contains titanium dioxide—the whitest paint pigment known. So your freshly painted house will be whitest-of-white. And, with Du Pont House Paint, it will *stay* white. That's because . . .

3. It's self-cleaning

All paints collect dirt on exposure. But, with Du Pont House Paint, "self-cleaning" starts after a few months of normal weather conditions. A fine white powder forms on the surface. Heavy rains wash this away, carrying the dirt with it—leaving the newly exposed surface clean and white again! (Unusual climatic or dirt-collecting conditions in extremely sooty industrial communities may, of course, delay this process.) Because this "self-cleaning" is gradual, the wearing qualities of the paint film are not abnormally affected.

▶ Despite this remarkable quality of Du Pont House Paint, it costs no more than other good paints. Call in a reliable painter for your painting job, and specify Du Pont House Paint. It's available in white, and in durable tints.
