RE: Physicians Conference
New Orleans — November 9 and 10, 1978

As soon as you find it convenient, I would very much appreciate an outline of the conclusions during this recent conference and any other pertinent information that you think I should be aware of.

As you undoubtedly know, asbestos is becoming a most explosive issue, and all of our Sales Personnel are constantly being asked by their customers about any and all new developments regarding this raw material.

Many thanks.

B. Iwarsson
