Montreal

The request in your November 27 memo on the above subject has been turned over to Research. Work had been initiated but several delays in scheduling and personnel changes have delayed completion of the work. Many requests are now being received by this particular section of the analytical group for similar information on Monsanto products. This group will continue the program to determine the requested information in order. We should have the data to you sometime the latter part of January. Hope this delay does not inconvenience Bob Johnson at GM Canada. He probably needs this as a matter of record and the timing is not that critical.

D.F. Smith

Jack for our conversation
please comment to Bob Johnson of GM
Canada direct. Thanks
(with cy to Oneson and me).
