

October 25, 1927.

Ethyl Gasoline Corp.,
New York, N. Y.

Gentlemen:-

This station has been supplied a quantity of Ethyl Fluid and quantities of gasoline have been mixed, in accordance with directions furnished.

On account of the apparent dangers incident to the handling of this fluid, it is desired to ascertain what action should be taken, in addition to the instructions printed on the can, in case the person has other contact that is not immediately noticeable. We would like to know something about the symptoms of poisoning by this fluid, the proper antidote, etc.

Any information you may offer calculated to assist us in affording necessary protection to men handling this fluid will be appreciated.

Yours truly,

SAMUEL CARTER,
1st Lieut. A.C.,
Asst. A.C. Supply Officer.
