Subject: OSHA INTERNAL ENVIRONMENT MONITORING

Attached is a copy of a report made up by Mr. Fassuliotis on OSHA Internal Environment Monitoring at our plants. Proposition No. 4 on Page 3 was agreed to by Corporate Management.

Would you by January 15, submit to Mr. Fassuliotis the name of the person at each of your plants who will handle the testing per the attached bulletin. I would think that the person would be either the Plant Engineer or Plant Chemist.

Please send the names of these people to myself and Mr. Fassuliotis by the date mentioned above. Also, give any assistance to Mr. Fassuliotis needed to help train the person assigned.

DEPARTMENT OF ENVIRONMENTAL PROTECTION
TRENTON 08625

OFFICE OF THE COMMISSIONER

ORDER OF ADOPTION
N.J.A.C. 7:27-17, Control and Prohibition of
Air Pollution from Asbestos Surface Coatings

DOCKET NO. DEP-001-77-01

On March 14, 1977, the New Jersey Department of Environmental Protection, hereinafter referred to as the Department, held a public hearing to receive comments on a proposed regulation for the control of air pollution from asbestos. The regulation (N.J.A.C. 7:27-17), which was proposed and considered at that time, is hereby adopted as set forth in the following text:

(See Attached)

Legal notice of the proposed regulation and the aforementioned public hearing was given as required by law. Advertisements concerning the hearing appeared in various newspapers throughout the state. Witnesses appeared at the public hearing and written statements were received. The hearing record was closed on March 21, 1977.

In response to the public testimony received, several changes from the original proposal were made. These are discussed in the EVALUATION OF TESTIMONY section of the Report of the Public Hearing issued by the Department (copies available from Mr. Herbert Wortreich, Chief, Bureau of Air Pollution Control, P.O. Box 2807, Trenton, New Jersey 08625).

As Acting Commissioner of the Department of Environmental Protection, in accordance with the provisions of N.J.S.A. 26:2C-1 et seq., I have promulgated this Rule of the Bureau of Air Pollution Control entitled Control and Prohibition of Air Pollution from Asbestos Surface Coatings to be effective on August 15, 1977.

Rocco D. Ricci, P.E.
Acting Commissioner

DATED June 13, 1977

NEW JERSEY DEPARTMENT OF ENVIRONMENTAL PROTECTION

NEW JERSEY ADMINISTRATIVE CODE

TITLE 7, CHAPTER 27

SUBCHAPTER 17

CONTROL AND PROHIBITION OF AIR POLLUTION
FROM ASBESTOS SURFACE COATINGS

Promulgated: June 13, 1977
Effective: August 15, 1977

7:27-17.1 Definitions

"Asbestos" means actinolite, amosite, anthophyllite, chrysotile, crocidolite, tremolite.

"Department" means the Department of Environmental Protection.

"Friable material" means any material which can be crumbled, pulverized, or reduced to powder by hand pressure.

7:27-17.2 General Requirements

No person shall cause, suffer, allow or permit surface coating by spraying on any building, structure, facility, installation or internal or external portion thereof, asbestos or friable material containing in excess of 0.25% (by weight) asbestos.

7:27-17.3 Tests

(a) Any person responsible for the manufacture, application or use of any coating, applied on or after the effective date of this Subchapter, which the Department, or any agent thereof, has reason to believe contains asbestos shall, when requested by the Department, conduct such tests as are necessary in the opinion of the Department to determine the presence and the amount and/or kinds of asbestos in the coating. Such tests shall be conducted in a manner approved by the Department and shall be made at the expense of the person responsible.

(b) The Department may waive the testing requirements of subsection (a) of this Section upon receipt of a materials specification report from the material manufacturer certifying that the asbestos content of the surface coating for which testing is required complies with the provisions of Section 17:2 of this Subchapter.
