Repauno Plant
Gibbstown, New Jersey

September 29, 1976

TO: ALL ICD PLANT MANAGERS (See attached***)

ASBESTOS SUBSTITUTES

Suitable replacements for asbestos were found for almost all uses at Repauno in a joint program between the Mechanical Department and Industrial Hygiene Committee.

Infrequently used items were deleted from Stores stocks. Fiberfrax[®] paper, cloth, and rope; fiberglass cloth, tape, and tubing; and padded Nomex[®] gloves were selected as replacement materials. A list of the various asbestos items, their replacements, and vendors is attached.

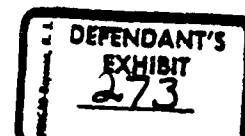

Annual cost for these items is expected to be about the same as for asbestos; the higher cost for the Fiberfrax[®] is about offset by the lower cost for fiberglass.

Richard N. Knowles

Richard N. Knowles, Chairman
Industrial Hygiene Committee
