I have received the following recommendation from Dr. Mirra and Bob Logan specifying the wording to be used on a label describing the potential hazards of asbestos fiber:

[redacted]

This product contains asbestos fibers. Inhalation of asbestos fibers in excessive quantities over long periods of time may be harmful. Avoid breathing the dust. If adequate ventilation control is not possible, wear respirators of a type approved by the U.S. Bureau of Mines for pneumoconiosis producing dusts.

Bob Logan said that the label be applied to each package, pallets, or the like pallet that each board.
