W.P.B.

NO. 2840
February 22, 1945
SS. NO.

TO: Mr. Edward Browning, Jr., Director
Bureau of Stockpiling & Transportation

THROUGH: Mr. James Douglas, Chairman
Mineral Resources Operating Committee

FROM: Captain E. C. Jasper, USN Emory C. Jasper Capt. OD
Lt. Commander K. G. Pearson, USNR K. G. Pearson, Lt Comdr, U.S.N.R

The Cork, Asbestos & Fibrous Glass Division, on January 25, 1945, recommended that the "safe reserve stock limit" for Rhodesian Chrysotile C&G/3 be established at 7,100 tons.

The Mineral Resources Operating Committee, after consideration and with concurrence of the Division, approved 7,100 tons as the "safe reserve stock limit" on January 31, 1945. This limit represents a six months' supply at the current rate of consumption for the second half of 1944.

The "safe reserve stock limit" as established by the Mineral Resources Operating Committee meets with our approval.
