Subject: Correction of Violation

Dear Sir:

Mr. Raymond Skinner of your office inspected our premises on May 29, 1974 for suspected carcinogens listed in 29 CFR 1910.93. Two of these suspect chemicals (10 grams each) were in our library of analytical standards. Upon viewing the storage facilities for these chemicals, Mr. Skinner indicated we were possibly in violation of 29 CFR 1910.93.

After a review of 29 CFR 1910.93, we decided that in view of these regulations our best course was to dispose of these chemicals. This was done on June 17, 1974, employing a digestion procedure approved by Mr. Raymond Skinner via telephone.

This letter will inform you that the violations listed in OSHA Citation S9361-23-74 have been corrected.

Yours truly,

Paul E. Hime
