U. S. S. California at Santa Cruz

The U. S. S. California will anchor in Santa Cruz harbor during the Elk's convention in that city. Captain Zeigemeir has advised the Elks that the dreadnaught will arrive Thursday afternoon.

HARD DAY'S WORK NEVER TIRES HIM

Los Angeles Man Tells of
Wonderful Change in
His Condition Since
Taking Tanlac.

"If anyone needing medicine doubts that Tanlac will rid him of his troubles he has only to try it to be convinced," declared Pete Torte, 4642 East First Street, Los Angeles, Cal.

"I have always been in rugged health until about two years and a half ago, when I began to notice a catch in my right side and a pain in my back that became especially bad in cold damp weather. My appetite left me and I couldn't eat meats or any other solid foods without suffering terribly from indigestion. I never slept more than two or three hours at night and woke up feeling as tired as on going to bed. It took all the strength I could muster to get through a day's work.

"One day a friend told me that Tanlac was doing him a world of good and urged me to try it. So I did and my appetite picked up, I got feeling better at once, and now I can eat pork chops or anything else I want and never feel a touch of indigestion. When six

Wrong Ideas on Paint Economy

THERE'S one way to save on paint. That way is to use the best paints.

Some think of paint economy as "cost per gallon." That is wrong. Cheap paint doesn't cover as much surface—you need more gallons.

Cheap paint is more difficult to spread, requires more labor, so the best paint costs no more when you've put it on the house than cheap paint does.

More than that, it lasts five or more years longer, if properly applied, while cheap paint on the average begins cracking in twelve months. Good paint is an investment that saves money by preventing deterioration of the house.

"Cheap" paint is the only paint that really costs you anything.

Don't allow surfaces to rot—it costs less to paint them.

We've made paints for western use for 72 years. We use pure PIONEER WHITE LEAD, pure linseed oil, zinc and color, but we mix them in scientific proportions with long-time skill.

Our white lead base must be fine enough to pass through a silk screen with 40,000 meshes to the square inch. That means covering capacity and ease of spreading. We super-purify the lead to make it "whiter" which means clearer-toned colors.

The finished product on the house is a beautiful, elastic, tough protective coating. We call these paints "Fuller's Specification House Paints" because they are the very best made for the purpose.

Fuller's SPECIFICATION House Paints

Phoenix Pure Paint
Pure Prepared Paint

Manufactured by W. P. Fuller & Co.

"Pure Prepared" and "Phoenix" are Fuller's specifications for house painting. Get either and you have the best that anyone can make—long service paints.

Paints are important to you so it's important to go to the right stores to get them. Agents' names and addresses are printed in the memo. coupon to the right. Cut it out and put it in your
