

Interoffice Communication

To C. Buller, Jr.
From J. A. DeBernardi
Date November 25, 1975
Subject Vinyl Chloride Exposure - November 17, 1975

This letter is to inform you that the results of your personnel dosimeter testing of November 17, 1975 indicate you were exposed to a vinyl chloride concentration in excess of the permissible exposure limit set forth in OSHA Standard, Title 29, Chapter XVII, Part 1910.93(q). Your dosimeter results indicated an exposure of 1.60 ppm measured over a 7.95 hour period occurred on the above-mentioned date. A review of job functions being performed would indicate your exposure occurred while you were involved in heel sampling of the VCM ship "Sigurd Jorsalfor", and while investigating a leak at the tank car loading rack. You were protected with fresh air during these operations.

This notice is in compliance with OSHA Standard, Title 29, Chapter XVII, Part 1910.93(q), Section (M)(3), Standard for Exposure to Vinyl Chloride.

Corrective action that is under study or in engineering stages to reduce the potential of exposure related to heel and finish cargo sampling of VCM ships were included in my letter to you of June 6, 1975.

A handwritten signature in cursive script, appearing to read "J. A. DeBernardi".

Interoffice Communication

To C. L. Landon
From J. A. DeBernardi
Date November 25, 1975
Subject Vinyl Chloride Exposure - November 24, 1975

This letter is to inform you that the results of your personnel dosimeter testing of November 14, 1975 indicate you were exposed to a vinyl chloride concentration in excess of the permissible exposure limit set forth in OSHA Standard, Title 29, Chapter XVII, Part 1910.93(q). Your dosimeter results indicated an exposure of 10.90 ppm measured over a 6.83 hour period occurred on the above-mentioned date. A review of job functions being performed would indicate your exposure occurred during the heel sampling of the VCM ship "Global Gas". You were protected with fresh air during this operation.

This notice is in compliance with OSHA Standard, Title 29, Chapter XVII, Part 1910.93(q), Section (M) (3), Standard for Exposure to Vinyl Chloride.

Corrective action that is under study or in engineering stages to reduce the potential of exposure related to both heel and finish cargo sampling of VCM ships were included in my letter to you of July 24, 1975.

A handwritten signature in dark ink, appearing to read "J. A. DeBernardi".

Mr. J. A. DeBernardi, Plant Manager
Continental Chemicals
Continental Oil Company
P. O. Box 605
Westlake, Louisiana 70669

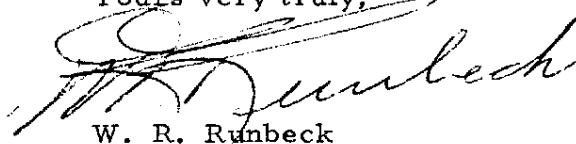

Dear Mr. DeBernardi:

**EMPLOYEES' EXPOSURE TO VCM
LETTER OF AGREEMENT
FLUOR CONTRACT 458004**

Attached are three executed copies of your Letter of Agreement covering employees' exposure to VCM while working in the Conoco Westlake VCM plant.

This letter of agreement supersedes the executed copy of an agreement referred to as Exhibit B, which was transmitted to you by my letter of October 17, 1975.

Yours very truly,

W. R. Runbeck
