Geert,

Thanks for sending this. Yes, many top executives of the Shanghai sponsors got a letter from Mehlman and we chose to respond. See attached Mehlman letter and our response. We recognized early that there potentially would be negative responses. I will forward this to the other sponsors and keep you in the loop of what we do. The 2-gen repro is of interest especially to the children's health (VCCEP) program in the US.

Regards,
Patsy

Patsy

Did you know this?
I will obtain additional information.

Regards,
Geert

Subject: Shanghai studies

I had the questionable pleasure of attending the Collegium Ramazzini meeting earlier this week in Italy. I will write up a note with the most noticeable communications of the meeting (including the findings of a 2-generation carcinogenicity rat study with Coca-Cola - ad libitum).

There were some quite negative remarks from some of the leaders of the meeting about the ongoing benzene work in Shanghai:

- only purpose is to discredit the NCI findings (Bingham)
- industry-sponsored studies equate to junk science (slide put up by Mehlman)
- ridicule by Mehlman about single response (P Clegg, Shell) to a letter to 45 oil executives

I'm sure you were already aware of this what looks like a coordinated campaign. If not, you're now.
