Mr. Elmer Wheeler
Monsanto Chemical Company
800 N. Lindbergh Blvd.
St. Louis 66, Missouri

Dear Elmer:

Some of our locations are either using or planning to use your product, Pydraul AC for lubricating their plant air compressors. Can you give me any information concerning the general composition of this product and its toxicity to animals and humans. We have two possible modes of exposure, by skin contact and by inhalation, the latter due to the fact that on occasion we use plant air for respiratory equipment. Any information you can supply will be appreciated.

Merry Christmas and a Happy New Year.

Sincerely,

Paul D. Halley
Director of Industrial Hygiene
