QUALITY SIGNS

Reg. U.S. Pat. Off.

MATERIALS AND FINISHES

We are offering the finest safety signs, industrial labels, pressure sensitive products, and markers. The products are unequalled for brilliance, performance, durability and safety.

- **"DURAFLEX" Safety Signs**—Manufactured from aluminum. The aluminum is special treated with a baked enamel surface. Baked on .040 aluminum. Recommended for permanent indoor and outdoor use.

Check these further advantages:

DURABLE—Brilliance of sign last for years, won't flake off, chip, or fade away; has superior staying powers. Costs less than ordinary painted signs.

TESTED—Actual outdoor tests prove its maximum resistance to:

- | | | |
|-------------|------------------|-------------------------|
| a. Weather | c. Water | e. Many Chemicals |
| b. Abrasion | d. Deterioration | f. Corrosive Conditions |

RUST-PROOF—No rusting possible with baked enamel on aluminum sheeting.

LIGHT-WEIGHT—Easy to handle; but tough.

- **"SAFETY-LITE" Reflective Signs**—Manufactured from aluminum with wide angle flat-top "Scotchlite" Brand Reflective Sheeting as the reflective surface on .040 aluminum. Recommended for permanent indoor and outdoor use.

Check these further advantages:

REFLECTORIZED—Message stands out, cannot be overlooked. Gives around the clock visibility—saving lives and property under all weather conditions. Reflects at any angle in its true shape, size and color at night. When a light is shined on the sign it will reflect extremely bright.

RUST-PROOF—Reflective sheeting is permanently bonded by machine to aluminum blank—not affected by water or corrosive conditions.

DIRT-FREE—Glass-like surface maybe wiped clean with dry cloth.

DURABLE—Will outlast painted signs without fading or losing reflective qualities.

LIGHT-WEIGHT—Easy to handle; but tough.

- **"T-STEEL" Steel Sign**—Manufactured from steel. This prime steel is treated with durable baked enamel paints. Will give good outdoor or indoor service.
- **"GLOWFLEX" FLUORESCENT** Made on Aluminum. A brilliant high visibility product. Durable and will withstand weathering and abrasion for a long time. Does not reflect, but is very, very bright during daylight hours. Exposure to the sun will affect longevity. Indoors or non-exposure to the sun, sign or marker will last much longer.
- **"GLOW-IN-THE DARK"** Phosphorescent Signs—Does not reflect. However, in total darkness it glows or shines by itself without any outside lights or aids.
- **"DURAPLAZ" Plastic Sign**—Made of Durable plastic. Impervious to deterioration. Non-Rusting. Chemical resistant. Color fast.
- **"PIMAR" Pressure-Sensitive** A Pressure material that is tough and durable. Has a high degree of heat resistance, is permanent and has superior adhesion characteristics. Can be applied in relatively low temperatures. Surface is smooth and very resistant to most elements. Press in place on a clean, smooth, dry surface.
- **"STALAR" Pressure-Sensitive** A Pressure material that is tough and durable. The adhesion is excellent and permanent. Surface is smooth and resistant to most elements. Press in place on any clean, smooth dry surface.
- **"SSC" Press-on**—A tough plastic material that is tough and durable. Gives maximum resistance to abrasion, weather, water, deterioration, corrosive conditions and other chemicals. A pressure-sensitive product.
- Other materials are listed in respective places hereafter.

Note: The .040 Aluminum is similar in gauge to 18 gauge steel. The special .063 Aluminum is similar in gauge to 14 gauge steel. Each sign has mounting holes and rounded corners.

APPROXIMATE WEIGHT OF DIFFERENT SIGNS

TWIST

TEMPERED GLASS Traffic Safety Mirrors

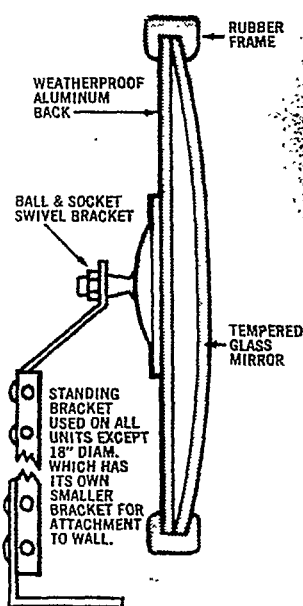

- Withstands Terrific Punishment
- Designed for Outdoor Locations where Danger from Vandalism Presents a Problem

"TEMPERED GLASS TRAFFIC SAFETY MIRRORS" are used primarily at outdoor locations, street intersections, loading platforms, entrances and exits, where blind corners and cross aisle intersections present a traffic problem. They can also be used indoors to protect employees, equipment and merchandise.

Mounted 8 to 10 feet high, they reflect cross movement of oncoming traffic around blind corners—thereby removing the principal cause for collisions.

"TEMPERED GLASS TRAFFIC SAFETY MIRRORS" are made in various sizes, and are available in CONVEX or FLAT glass. They are backed with aluminum and have a heavy duty rubber frame, thus making them weatherproof and adaptable for outdoor use. The ball and socket swivel assembly on the back adjusts to any desired viewing angle.

PACKING—Each mirror is individually packed in a specially designed, double wall corrugated container. Installation instructions and mounting brackets are included in the package.

CIRCULAR CONVEX

Style Number	PRICE

— FORWARD —

Safety Sign Company in presenting the "SAFMARK" Systems and Methods of Safety, Identification, and Instruction Markings has divided their manufacturing operations into the following general divisions:

1. "Manufacturers" of Industrial Safety Signs for Accident Prevention and Information for Safety, Maintenance and Engineering.
2. "Manufacturers" of Traffic Control Devices for Streets and Highways. This consists of Guide, Regulatory, and Warning Signs, etc.
3. "Manufacturers" of Pressure-Sensitive Printed Products of Identification, Safety and Instruction Markers for Safety, Labeling and Maintenance.

As a result this catalog has been divided into the following sections:

- Section I. Metal, Plastic and Reflectorized Industrial Safety signs and allied products. This includes pages 3 to 49.
- Section II. Metal and Reflectorized Traffic Signs and similar products. This includes pages 50 to 61.
- Section III. Pressure-Sensitive Signs, Labels, Markers, Nameplates, Numbers and other related products. This includes pages 62-80.

— SPECIAL SIGNS —

Our Service Department will be happy to cooperate with you in the design of your individual sign requirements. Send us all specifications, as to size, color, quantity, type of material, sketch or blueprint, and any other pertinent information.

Minimum order is \$30 on any one special order. Cost of artwork, dies, engravings, type set-up or any other special charges is not included in \$30 minimum order charge. Artwork, dies and patterns are kept by us for use on reorders.

Intelligent, prompt and courteous service has been our policy since the inception of Safety Sign Company.

While this catalog is by no means a complete description of our operation, we are ready to give your inquiry or order the precise attention it requires.

"SAFETY!!!!" IN ACTION AT NIGHT!

You can also get these added benefits from the "Safetylite" Reflective Signs: In case of a power failure under normal conditions of darkness reflectorization gives added safety—with the aid of a handlight—employees or emergency crews spot the signs and markings representing critical areas, repairs are speeded, fire fighting equipment is quickly located and emergency procedures go into action at once. Outside the plant, reflectorized signs and markings will guide vehicles and emergency equipment when lights go out in a plant. A beam of light puts reflectorized signs to work in the dark.

Minimum Sign Order \$5.00

Prevent accidents, save lives, save property, save money, save time, and save production are in large the basic aims and objectives of a good safety, maintenance, or production program.

In every industrial plant, mine, building, highway, public utility and in every walk of life the accident factor is with us. A definite way to control these hazards is through education and information—Safety Signs and Markers help to achieve these objectives.

We, also, present systems for control of mistakes, guesswork, and interruptions. These systems will avoid costly mistakes, save on expensive help and speed up production.

In this manual we have endeavored to present the latest and the best that science has to offer in labels, markers, pressure sensitive products and signs. In keeping up with the constant changing times we are utilizing products in the production of our products of the highest quality and the most durable in the industry.

The latest methods and equipment are used to insure the finest quality products, and all signs, markers, and our many other products are manufactured under high standards of quality control. They are, also, laboratory and outdoor tested as an additional guarantee of their quality. In this the most complete catalog on the market we offer the many new ideas and methods that have become known as the "Safmark" System.

According to American Standards Association Specifications

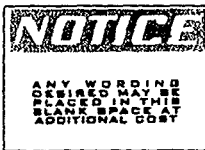

Markers and signs are made in accordance with American Standards Association Specifications. Markers and signs other than these standards are made because of their wide acceptance and proven effectiveness. Items in this catalog meet industrial and military specifications, Z35-1, A-13.1, Z-53.1, 6.1 U.S. Manual on Traffic Control Devices for Streets and Highways, etc.

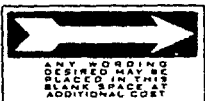

Danger signs shall have a WHITE background. Word "DANGER" shall appear in white letters on a Red oval inside a black rectangular panel. Sign wording should be black letters on the white background. Danger signs should be used only where an immediate hazard exists.

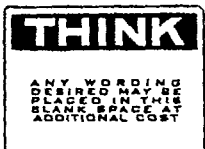

Caution signs shall have a YELLOW background. Word "CAUTION" shall appear in YELLOW letters on black rectangular panel. Sign wording should be in black letters on the yellow background. Should be used only to warn against potential hazards or to caution against unsafe practices.

Informational signs may be of a variety of designs and colors, except that neither red nor yellow shall be used. They convey information not necessarily of a safety nature, but tend to avoid confusion and misunderstandings.

Directional signs shall have a WHITE background. "ARROW" should be in white on black panel. Wording in arrow or below panel should be in black. Used to indicate ways to locations: exits, fire escapes, stairways, first aid rooms, etc.

Safety Instruction signs should have a WHITE background. If such words as "THINK" or "SAFETY FIRST" are used, they should be in WHITE letters on green rectangular panel. Sign wording should be in black letters on the white background. Should be used for general instructions and suggestions relative to safety measures.

Terms and Conditions of Sale

Since we have no means of controlling the final use of the products by the customer or user; all statements contained herein are based on tests we believe to be reliable. However, the accuracy or completeness, thereof, is not guaranteed, and the following is made in lieu of all warranties, expressed or implied: Sellers and Manufacturers only obligation shall be to replace such quantity of the product proved to be defective. Neither seller nor manufacturer shall be liable for any injury, loss or damage direct or consequential, arising out of the use of or the inability to use the product. No statement or recommendation not contained herein shall have any force or effect.

TRAFFIC SIGN POSTS

Sign Posts are manufactured from a rail steel flanged channel section. The design of this section makes it one of the strongest possible for use as Route Marker Posts and Highway Sign Posts. The use of rail steel in rolling this section gives it the high tensile strength desirable for this use.

Each of these posts is punched with fifty-eight $\frac{3}{8}$ " holes on 1" centers beginning 1" from the top of the post.

*Posts are shipped five per bundle.

15% Added on Broken Bundles

WT. PER FT. 2.00 Lbs.

PORTABLE WARNING SIGNS

Double Faced Sign—Size 18" x 18".
Sturdy, nontipping angle iron
frame folds flat for easy
transporting and storage.

MW-21 (without Flags)	\$11.95 ea.
MW-31 (without Flags)	\$14.95 ea.
Fluorescent Flags	\$ 2.35 ea.
Red Flag	\$ 1.45 ea.

MW-31

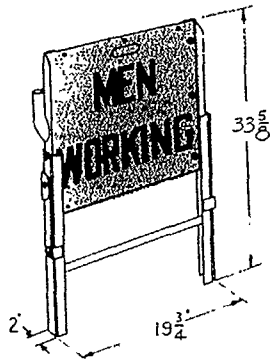

Fluorescent Type Sign

Frame and Flag are Red

Flags are vertical mounted—No angle mounting of flags; as this obstructs workers and makes necessary sign being placed quite a distance from where it would be the most effective.

PORTABLE WARNING SIGN

TMW-41 (MEN WORKING) SIZE: 24" x 24" Plain Flat Steel\$14.85 ea.
(Without Flag)

"SSC" WARNING SIGN

This portable sign is ideal for heavy duty wear and tear. A socket of 3/4 inch pipe at the side of the frame provides support for a warning flag, flag bracket or lantern. The pivoted panel (MEN WORKING) is free to move 35° from the normal vertical position. This feature will cause wind pressure to exert a downward force on the sign, tending to anchor it more firmly to the ground. Weighs approximately 23 pounds. Sign is baked enamel steel.

PWS-356 (Without Flag)	\$21.95 ea.
RED FLAG	\$ 1.45 ea.

PWS-356

"HI-GLOW" FLUORESCENT PAINT

Paint with brush—Barricades, posts, etc.

XPF-200

USHO 002805

"PX-100" GLOW-IN-THE-DARK TAPE

Pressure-sensitive phosphorescent luminous tape
Glow by itself after brief exposure to artificial or natural light.
No Radium. Completely Safe.

**ROUND-THE-CLOCK IN-PLANT GUIDANCE**

It's a pressure sensitive PHOSPHORESCENT vinyl tape. The product **DOES NOT** reflect light . . . it **STORES** light in high abundance when exposed to direct sun light, or any artificial source. PHOSPHORESCENT TAPE gradually releases a radiant glow of high initial brightness, which diminishes with each passing minute. BUT, to dark adapted eyes the phosphorescence persists in total darkness for **EIGHT** long hours. There is no limit to the number of times this tape can be activated.

SOME APPLICATIONS:

Aisles	Danger Areas	Freight Elevators
Ramps	Machinery	Barricades
Stairs	Switch Boxes	Exit Signs
Trucks	Telephones	Aircraft
Valves	Trains	Emergency Equipment

A MODERN CHEMICAL METHOD TO IDENTIFY — GUIDE — WARN AND INSTRUCT IN TOTAL DARKNESS!

PIPE MARKING AND IDENTIFICATION TAPE

This tape is to be used as a color code for pipes. In the event pipe insulation is in poor condition this tape would be wrapped around the pipe prior to placing of a pipe marker. This tape lasts up to 5 times longer than conventional materials. Tape should be used only as a supplement to the use of signs or markers.

TO APPLY: PRESS IN PLACE TO ANY CLEAN, DRY SURFACE.

PRESS-ON ACCIDENT PREVENTION Signs

"STALAR" and "SAFETYLITE" Safety Signs

REDUCE ACCIDENTS BY MARKING HAZARDOUS SITUATIONS!

- **"STALAR"**—Is a plastic material for indoor or outdoor use. Actual outdoor tests prove maximum resistance to: weather, abrasion, water, deterioration, corrosive conditions and many chemicals.
- **"SAFETYLITE" REFLECTIVE**—Message stands out, cannot be overlooked. Gives around the clock visibility, saving lives and property under all weather conditions. Reflects at any angle in its true shape, size and color at night when a light is flashed on the sign. For indoor or outdoor use.

Basic Sign Can Be Used Alone.

Basic Sign Can Be Used Alone.

Or Combined To Equal The Above Unit.

Typical Application of "STALAR" Sticker

The Safety Labels are made from two materials:

1. **"STALAR"** No moistening necessary—simply peel and press in place.
 2. **"SAFETYLITE"** Reflective Labels, will reflect when light is shown on sticker. To apply peel and press in place.
- The stickers will avoid costly mistakes, save on expensive help and speed up production.

Apply To:
Clean, Smooth,
Dry Surface.

INDUSTRIAL IDENTIFICATION AND SAFETY EMBLEMS

Typical
Hard Hat
Emblem
Installation

ALL ITEMS ON THIS PAGE ARE PRESSURE-SENSITIVE—SIMPLY PRESS-ON CLEAN, SMOOTH SURFACE.

FOR MARKING TRUCKS, CARS, EQUIPMENT, LIFT
TRUCKS, HATS, PROPERTY, ETC.

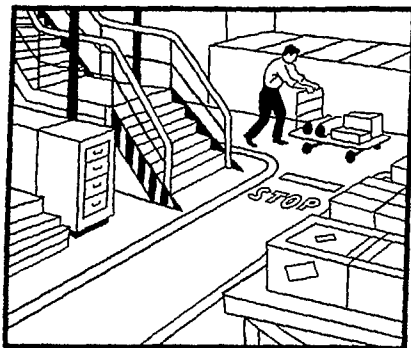

These industrial identification and safety emblems are available in the following:

1. Wide Angle "Scotchlite" Reflective Sheeting. They give you Added safety at night—seen at all hours, same size, shape and color. Very durable and easy to apply—saving time, labor, and money. Will not tie up your equipment, just a few minutes to apply, simply press in place.
2. "SSC" Vinyl Press-On. Very effective and inexpensive method of marking equipment. Will not tie up your equipment, just a few minutes to apply, simply press in place.

Send us your specifications and we will quote on your requirements.

USHO 002818

"SSC" VINYL PLASTIC TAPE

Lane markings of tape are easily applied and insure constant, uninterrupted flow of materials to factory production areas.

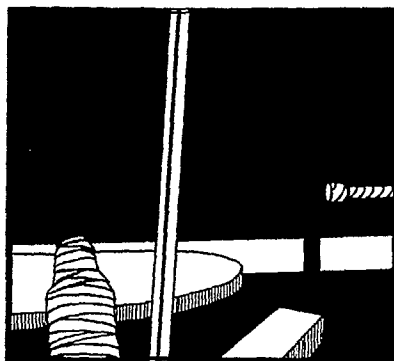

- Lane marking.
- Color coding.
- Identification.
- Decorating.
- Protection against heat, caustics, and weather.
- Masking.
- Permanent—Indoor or outside use.
- Lasts up to 5 times longer than conventional materials.

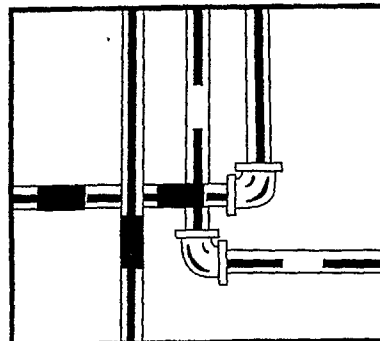

PAT-200

XPF-200-M

For protection against deterioration, pipes exposed to moisture, acids, or corrosive fumes are wrapped with Plastic Tapes. Ideal for color coding.

PIPE CODING

Eliminate hazards by identifying material. Avoid guesswork—save time. More durable than paint and less expensive to apply.

For applying as lane markings on concrete or wood floors, for safety zones, aisle marker, storage areas, stairways, barricades, low ceilings, pillars and moving overhead objects.

Apply to clean, dry, smooth surface, tape goes on with a touch, just roll and press in place—no drying time.

Easy to clean and durable, also is very strong. Resists oils, acids, alkalis, grease, salts, caustics and most solvents.

COLORS	Price per roll	
	2" x 36 yds.	3" x 36 yds.
PAT-200 Yellow	\$ 8.95	\$11.95
PAT-201 White		
PAT-202 Red		
PAT-203 Black		
PAT-204 Green		
XPF-200-M "Glowflex" Fluorescent Yellow-Orange	1" x 36 yds.	\$12.95

Use tape markings to direct motorists to parking stalls and specific repair areas. Tape is easily cleaned with gasoline or other common commercial solvents.

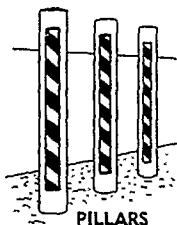

USHO 002819

PLASTIC BARRICADE TAPE

TYPICAL INSTALLATION (TEB-50)

TYPICAL INSTALLATION (TEB-60F)

TEB-50

TEB-60F

For indoor or outdoor use. For marking off hazardous or off-limit areas. Durable, flexible and easy to use. A convenient method of clearly designating temporary aisles or warning of unsafe condition. Can be tied, stored, and otherwise handled like rope. Breaking strength exceeds 220 pounds. Chemical resistant. (This is not a pressure-sensitive item.)

CODE NO.	SIZE	PRICE
TEB-40	3/4" x 150 Ft. Roll	\$ 3.75 per roll
TEB-50	3/4" x 300 Ft. Roll	\$ 6.60 per roll
TEB-60F	1" x 100 Yards	\$15.95 per roll

PLASTIC BARRIER ROPE

Light and flexible yet much stronger than manila. Has high dielectric properties, will not absorb water and it floats. Consists of 2 strands yellow, 1 strand black.

PBR-1 3/8" x 200' \$13.95 per coil

PBR-2 3/8" x 600' \$35.90 per coil

MISCELLANEOUS INFORMATION

STOCK SIGNS

All signs are exactly as shown in the catalog. Any changes, other than options shown, are special signs at special prices with slower delivery.

RETURNED MERCHANDISE

Obtain our permission before any goods are returned. Pack carefully and be sure your return address is clearly shown. We cannot issue credit unless merchandise is received in its original condition. Some errors will occur, but we are ready and anxious to correct our mistakes. **Special signs are not returnable.** A 15% handling charge plus refinishing charge of 10% if necessary is applicable for stock items returned for credit with transportation charges prepaid. Returned merchandise subject to inspection approval by the company prior to acceptance.

ROUTING

Unless routing is specified on each order, our shipping department will route all

shipments the best way (parcel post, express, rail or motor freight). If shipment is to be collect, please specify.

DAMAGED MERCHANDISE

Your order was carefully packaged for safe shipment when delivered to the transport agent.

Damage in transit is the responsibility of the carrier. Be sure to have the driver sign a copy of the freight bill with damage noted. If parcel post, have the postmaster complete proper form.

Our responsibility ends when the shipment is picked up.

CONCEALED DAMAGE

If goods are discovered damaged upon inspection after delivery, call the carrier immediately for an inspection report.

Stenographical and clerical errors or omissions subject to correction. All agreements made contingent upon strikes, fire, accidents or causes beyond our control.

Although prices are subject to change without notice, you will always receive the lowest possible prices. This catalog cancels and supersedes any conflicting folder or catalog prices.
