Wakefield House,
Sasoon Estate,
BOMBAY-400 001.

Kind attn of Mr. Narayan or
Mr. Shivaraman.

Dear Sirs,

For quite some time in the past we have been writing to you on our doubts and problems of Askarels and you have been answering these patiently and satisfactorily. We appreciate your co operation in this respect.

I am glad to advise you that I expect to visit U.S.A. in the 2nd/3rd week of October,'76. I would like to take this opportunity of visiting your principals and have further discussions on some points as below:-

1. Existing rules and laws in U.S.A. towards:-

   Protecting workers when working with P.C.B's in a factory and prevention of contamination of the enviornments.

   In particular I would like to study the extra machineries involved and their costs.

2. Alternatives to PCB if involved. I would like to sit down with the development people to apprise myself of the latest trends and directions of development.

3. We have very little data on the discharge inception voltages or their magnitudes on the processed oils themselves with respect to the presence of air, nitrogen and water traces in oil. I would like to go into more details of these as also in the breakdown processes of capacitors in general and the precautions to be taken on this.

4. I believe some of the impregnating processes for impregnating plastics have been patented quite some time back. I would like to discuss various salient features and the latest technology and trend of overcoming some of the short comings in this field.

3. I would naturally like to collect as much relative data or articles and list of references during the visit.

We will appreciate if you could write to your principals on the proposed visit and its purpose and arrange for the same. I can give an exact date later after hearing from you on a suitable place. Please advise accordingly.

Thanking you,

Yours truly,
for MADHAV CAPACITORS PVT. LTD.,

Director.
