August 17, 1937

Dr. W. L. Machle
University of Cincinnati
Department of Medicine
Cincinnati, Ohio

Dear Doctor Machle:

Re: [REDACTED]
Deat in

The above named man was employed by the Gulf Refining Company in Cleveland, Ohio. He died on July 27, 1937 as a result of Tetra Lead Poisoning. I am advised by the Gulf Refining Company's Toledo office that you conducted some technical investigation for the Ethyl Corporation. I would appreciate it very much if you would advise me the results of this investigation. This man had a \$2,000 policy with us containing double indemnity benefits.

I can assure you any information you can give will not be disclosed to anyone but will be used only by this Company for Payments of Benefits under our policy.

Very truly yours,

James Van Vorst
District Inspector
