PLAINTIFF'S EXHIBIT WRG-1633

The latest version of the employee handout is considerably better than the original one, in my opinion. I have only three comments.

(1) On page 3, the second sentence of the second paragraph contains the phrase "generally considered nuisance dust". It is my understanding that nuisance dust could not accurately be used to describe a dust containing asbestos. I suggest that the phrase be omitted.

(2) In the middle of page 4, I suggest that "could be" be substituted for "is" in the phrase "form that is hazardous to your health".

(3) On page 7, the phrase "Asbestos alone does not appear to cause this disease;..." is inconsistent with the stand that J-M and A.I.A. have taken in the past. I believe there is no universal acceptance of this conclusion obtained from certain studies.
