"MECHANICAL PACKINGS FOR EVERY PURPOSE"

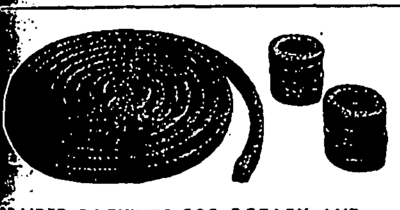

ANCHOR MOLDED CUPS, FLANGES AND "U" PACKINGS — Available in two styles.

Style 11—Dense Type Packing

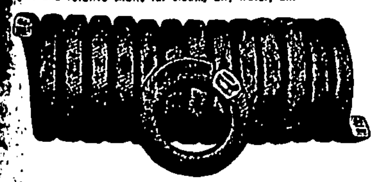

Style 43—Flexible Type Packing

Molded cups, flanges and "U" packings are formed by Anchor in accurately dimensioned molds, made with special compounds ranging from natural rubber to the most appropriate synthetic rubber, all assuring long life and low friction. Molded parts are used on a variety of equipment, packing against oil, solvents, air, water, gasoline.

BRAIDED PACKINGS FOR ROTARY AND CENTRIFUGAL PUMPS

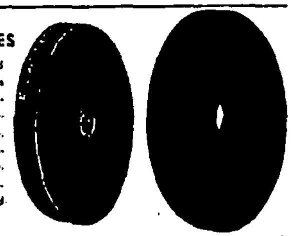

STYLE 317. Square plaited braid asbestos packing composed of carefully selected fibers, with every strand thoroughly lubricated and graphited throughout before braiding. Contains no metal wire. For use on rods, plungers and rotative shafts for steam, air, water, oil.

STYLE 210. Made from high grade asbestos fiber woven into a tightly meshed cloth, impregnated with a high heat-resisting compound and formed into packing sections with a rubber cushion back. For all purposes where steam temperatures do not exceed 600° F.

PUMP VALVES

Styles: Rubber and composition; valves for all pressures; liquids-condenser, vacuum and air service. Valves for pump manufacturers, mine operations, railroads, industrial plants and marine equipment.

ANKORITE 484-A

Manufactured from the finest materials, employing a new synthetic bonding compound. This sheet is designed to meet Navy specification 33-P-13c. For high or low pressures, with a wide degree of temperature ranges.

ANKLON

Anklon is the Anchor trade name for Teflon*. Due to its chemical inertness and its ability to resist the destructive action of the mineral acids, organic solvents and alkalies, it is finding many uses in packing and gasket applications where temperatures range from minus 90° F. to plus 500° F. Anklon is widely used in the chemical, petroleum, refining, food, electrical and power industries as well as in the maritime field, due to its complete chemical inertness, high resistance to heat, resistance to abrasion and other advantages.

*Teflon is the E. I. duPont de Nemours & Co. trademark for tetrafluoroethylene resin.
