Exposure Assessment Pls -

Stuart Cagen would like to organize a Technical Committee meeting at EMBSI next week (Dec 6-10) to review Exposure Assessment activities & progress under the CC / DP / ME Shanghai Health Studies...

Per Stuart's attached email, please reply by COB tomorrow (Wednesday 12/01) with your availability to join this meeting -- either in person or by conference call -- on the following dates/times:

Mon 12/6, 10am - 4pm
Tue 12/7, 10am - 4pm
Wed 12/8, 10am - 4pm
Thur 12/9, 10am - 4pm

Thanks! Bruce.

Let's recalibrate a possible meeting date for next week.

If we were to meet at EMBSI from 10 am to 4 pm, please let me know your available date(s) for next week:

Monday 6
Tues 7
Wed 8
Thurs 9

Thanks

My availability on the proposed dates is as follows.

Dec 2 - no
Dec 6 - yes, by conference call only
Dec 7 - no
Dec 8 - yes
Dec 9 - yes

and if needed,
Dec 10 - yes
Dec 13 - yes
Dec 14 - yes
Dec 15 - yes

Regards,
Don

All:

As per action items for the technical committee and the need to report to the oversight committee on Dec 16, I would suggest the following possible dates for meetings or conference calls as per Michael's offer to arrange something with the exposure team at EMBSI and for a separate meeting with Rich. These are my available dates prior to the Dec 16 meeting:

Dec 6,7

(I might also be available on Dec 2,8,9, but I would prefer Dec 6 or 7)

Subject: RE: BHRC Technical committee(Document link: Michael G Bird)

On Friday afternoon (11/19), I sat in on a review by EMBSI management of the EMBSI contract/involvement in the SHS. There were few issues identified that as a Tech Committee member I was not aware, however I came away with a

SHELL-MCCLURG-064445

much greater appreciation of the EA aspects of the study and operational aspects which impact other study components and in particular gained insight as to the needs and benefits of achieving quantitative exposure assessment for the DP and CC. Also the current lack of success of obtaining bone marrow for ME 2B and likely reasons for this. I think the BHRC Tech Committee would benefit from hearing this directly from Tom, Yimei and Rob. Richard Irons tends to represent and focus on the lab /clinical aspects - that's his expertise after all - but with the above EA input, I think the Tech Committee will do a much better assessment of what can be achieved, and \$\$'s needed, based on the 2 years of study experience.

I recommend that we have a conference call (or meeting) with the EA team additional to any visit to Denver and to do this, as soon as possible and before the next Oversight committee on December 12th. My intent is not to exclude Irons as PI - he could participate too - but I believe that our time as a committee focussing on the EA aspect (eg impact on the CC study) with the EA team would be enormously valuable, would provide a better basis for further discussions with the PI's, and for meeting the Oversight committee's expectations.

Please call if you want to discuss further or if I can help in convening the above.

Michael
