

March 25, 1975

TO: ALL SUPERVISORS

In order to help hold down operating cost, a respirator cleaning station has been provided. These respirators do an excellent job and can be freely worn by all employees. This is a recommended practice. However, unless otherwise abused, these respirators, which are more expensive than the old respirator, can be sanitized as per instructions on respirator cleaning station. Thus longer service can be achieved from each respirator. A service life will be duly recommended, so that, again, unless otherwise abused, the respirator can be maintained hygienically by employees for the period of its service life.
