FROM: H. A. Brown

SUBJ: Bureau of Mines Report
on Libby Asbestos Counts

cc: R. M. Vining
D. W. Shea, Jr.
Peter Kostic

I would like to know what action is planned as a result of the attached report.

For example, it appears that you should insist upon respirators being used on the ground floor. I also think we should make some more intensive checks ourselves in the areas that are not going to be eliminated when the new mill is finished -- such as the car loader, the loading dock foreman, and the mine areas when there are dusty conditions. There may be others; I am just pulling out examples.
