Subject Special Report TP-187
"Request for the Transfer of
BMMA-5715 Black 25 to Final
Manufacturing Status" by
Mr. L. D. Fishberg

It is hereby requested that the Manufacturing Department accept final transfer of BMMA-5715 Black 25 in plasticity grades 15, 16 and 18. This medium impact material competes successfully with Durez 1544 and Durez 22532, and will find extensive usage in electrical switch gear applications. Seven production runs were completed to date, during which time approximately 700,000 pounds of good material were produced.

Mr. D. Albright with whom this transfer request was discussed, is in agreement that final transfer of these grades can be made at this time.

Philip A. Thomas
