SUBJECT Flemington Effluent Water Testing

The high bacterial content of our final effluent water in Flemington has made it advisable for us to treat our settling ponds more thoroughly and to monitor the results. Accordingly, we will be sending you a sample of pond #5 spillway effluent each Tuesday and Thursday afternoon via inter-company mail. We request that you analyze these samples for bacteria count.

Results of your tests should be reported to me, with a copy to Mr. Fogelsanger, the Flemington Plant Engineer. This program will continue on a regular basis until the bacteria count has been reduced to acceptable levels.
