Messrs. W. P. Fuller & Co.,
San Francisco, Calif.

Gentlemen:-

LEADED ZINC:

We are enclosing herewith sample of
Pain. 5% Leaded and Arctic 35% Leaded Zincs submitted
to us for testing purposes by the Harmon Color Works.
We tried to obtain quotations on these Zincs for your
information, but they replied that they are in a
position to make a very interesting proposition when
our tests are completed and they are advised of approx-
imate quantities.

Very truly yours,

W. P. FULLER & CO.
