## **License Plate Readers on the U.S. Border**

U.S. Customs and Border Protection are planning to upgrade automated license plate readers to help monitor traffic on both the northern and southern borders. As it turns out, the recognition technology is reaping rewards and helping reduce cross-border crimes. [Read More](#)

## **Metrics for Measuring Cyber Effectiveness**

Intense worries about cybersecurity mean system owners are stacking up cyber tools to help protect their organizations, often duplicating features and capabilities in the process. The problem: There's no sure way to measure the effectiveness of one tool over another. [Read](#)

## **HIPAA's Threat to Health IT**

## What's Popular Now

Health information systems often focus on complying with data privacy concerns and fail to pay attention to data integrity and security. Protecting highly sensitive information – whether patient records, financial data or sensitive government information – should be baked into every information system. [Read More](#)
