Subject PYDRAUL A-200

2/9/59

First one never reached Traffic Department; asked to fill out another one.

dh

Poison? No.

9. Effect on Human Beings:
Pydraul A-200 can be absorbed through the unbroken skin with possible systemic effects as well as skin manifestations. At higher temperatures which may cause the evolution of vapors, the inhalation of such vapors can cause similar effects.

10. General Statement Covering Toxicological Data:
Animal toxicity data and human experience with Pydraul A-200 components indicate that there is no serious hazard to be expected from single massive skin exposures, such as might occur during the shipment of the fluid. Precautions to avoid skin contact and inhalation of vapors during daily use of the fluid, however, are recommended
