6th November, 1967.

Asbestos and Health
Preliminary Draft of the Docks Regulations

Thank you for your note of 2nd November.

At our discussion with Mr. Harvey last Friday he readily agreed to receive a letter from the A.R.C. in regard to the Regulations, and it seemed from the conversation that Mr. Hatfull (who was also present) would be very willing to agree at least with our proposal that "Asbestos" should be properly defined. The reaction to the suggestion that asbestos might be deleted from the list of dangerous materials was also less negative than I expected.

I am therefore asking Mr. Atkinson, in consultation with Dr. Holmes, to draft a suitable letter for the A.R.C. to send, after final approval by Dr. Gase and yourself and me.

John Waddell.

To: Mr. J. M. Atkinson,

This job is, I think, substantially covered by your memorandum of 27th October but I expect you will want to put this in a somewhat different form.

John Waddell.
