I would defer to Lynn on her recommendations, including the positive response of Jim Bus regarding Jay Goodman. I think Greim would be excellent but agree he is conflicted.

Richard Larson is a leukemia clinician. He is an expert and would appreciate the importance of chromosome abnormalities that are seen in human myelogenous leukemias. He is currently on the Shanghai Peer Review Panel precisely for this reason.

Importance: High

What happened to my other nominees???

I included the contact info for Jim Tucker (Wayne State University), Dave Eastmond (Univ Calif-Berkeley), and I don't know who Richard Larson is mentioned below, in the previous email, which I've re-attached to this email.

You are missing Thomas Loughran, MD (Penn State Cancer Institute), a renowned expert on Large Granular Lymphocytic Leukemia and other leukemias, who participated in an expert panel review/discussion on leukemias with my Dow colleague Dr. Pam Spencer, and was great.

Jim Bus felt that Jay Goodman would be very good at this, and I concur. I had this info in the previous email...did you get it?

I met Helmut Greim at the HESI mtg and he is very interested in the DNA adduct stuff. I would think that, as past chair of the German MAK commission, he would be conflicted out of this review panel...n'est pas?

Best Regards,

Lynn

W. Rawson, E. Moran and S. Cagen will review the final draft risk assessment report prior to transmitting it to the peer review leadership team.

THE FOLLOWING SCIENTISTS WERE IDENTIFIED AS PEER REVIEW NOMINEES:

Harvey Checkoway
David Cogle
Gary Marshall
Tucker ? Wayne State University
David Eastman ? Jefferson
Richard Larson ? University of Chicago Medical School
Helmut Grime ? Germany

The follow plan was designed to develop a more complete list of nominated peer reviewers:

L. Pottenger will send contact information for Marshall, Tucker, Eastman and Larson.

S. Cagen will send contact information for Checkoway.

J. Lewis will consult with M. Bird and provide additional nominations.

E. Moran will request suggestions for peer reviewers from the Risk Assessment Team.

L. Pottenger will discuss additional scientists with J. Bus.

J. Lewis will talk to R. Schnatter about experts in leukemia.

E. Moran will compile the list and circulate to the BWG for final review.

E. Moran will contact T. Scalli and update him on the status of the risk assessment.

W. Rawson will contact L. Hulse regarding the status of the residual risk rule for the HON category.

W. Rawson will develop the first draft of possible charge questions to suggest to Sciences International and circulate them for BWG comment.
