Attn: Mr. E. A. Thomas, Safety Superintendent

Dear Mr. Thomas:

The Occupational Safety and Health Administration is currently conducting a National Emphasis Program for programmed health inspections of establishments where asbestos is used, stored or processed. Also included in this National Emphasis Program are any sites involving asbestos demolition and removal activities. (OSHA Instruction CPL 2.60B)

Currently OSHA receives notices regarding the asbestos demolition/removal activities from the Environmental Protection Agency and the Texas Air Control Board, but in an effort to improve its response time OSHA respectfully requests that your company notify us of any asbestos demolition or removal activities on your site.

OSHA would like for you to also inform your asbestos demolition/removal contractors of the assistance available from our local office. The local OSHA Office functioning as a full service office resource center will gladly meet with any asbestos demolition/removal contractors prior to their scheduled work. The 29 CFR 1910.1001 Asbestos Standard will be fully discussed including viewing of a video tape and/or slides. Also in this session will be a discussion of respiratory protection, other PPE and specific monitoring requirements.

For notification purposes the address of our office is as follows:

U.S. Department of Labor, OSHA
Government Plaza
400 Mann Street, Room 300
Corpus Christi, TX 78401
(512) 888-3257

Together we can make the workplace safer and more healthful.

Sincerely,

R. L. Mike Hunter
R. L. MIKE HUNTER
Area Director
