

1 We can get a two-dimensional view at
2 multiple different sections in the body, so we can
3 basically do cuts of the body.

4 We can -- if we want to scan the chest, we
5 can do cuts at millimeter sections right through the
6 chest and look at those X-ray images, so it is a much
7 more sophisticated type of X-ray than a plain X-ray
8 and gives us a lot more information about what is
9 going on inside the body.

10 Q And did, in fact, Mr. Grewe have a number of
11 CAT scans done?

12 A Yes, I believe I saw three all together.

13 Q And did you at my request make a slide of a
14 particular portion of each of the CAT scans so that we
15 could show them to the jury?

16 A Yes.

17 Q Is that something that you customarily do
18 when you teach medical students or when you do
19 teaching?

20 A Sure.

21 Q Now, on the CAT scan I see that there are a
