

Back and front views, at our plant, of Metermax Combustion Control section of a complete L&N boiler gauge board for Picway Station, Columbus & Southern Ohio Electric Co. Right—Two-boiler L&N Control Board installed at Westover Station, New York State Electric & Gas Corp.

The PLUS VALUES OF PANEL ENGINEERING Give Better Power Plant Control

Panels engineered by L&N have every detail arranged to make the unit as useful as possible to the power plant's personnel. All Controllers and instruments—all gauges, dials and meters—all start-stop stations, switches and signal lights—are in proper sequence for convenient operation. Lighting is bright, level, glareless. Back-of-panel arrangement is exceptionally convenient. Panels show our ten years of experience in supplying *complete* units to meet the problems of power plants.

These Panels arrive with Metermax (or Type P) Combustion Controllers and/or Micromax instruments installed. Major equipment items which we do not make can be supplied or not, but the entire Panel, down to the last wire, is connected and checked. Either with the Panel or ahead of it we send complete structural and wiring blueprints, which greatly reduce the recipient's engineering and drafting work. The Panel as received is ready to install.

Further information will be sent on request.

Labelled in Russian, this is one of eight boiler boards shipped as shown to U.S.S.R. Metermax Controllers and Micromax Instruments are mounted. Wiring for separately-shipped equipment can be seen, cabled and tagged, in cut-outs.
