Receipt of Pictured Label by Patent Office: N/A

Problem-Solving Experience

It's common to ASME members and to Flexitallic Gaskets

Flexitallic Gaskets are the most widely used gaskets in the world. They are made of a special material that is designed to withstand the most severe conditions of service. They are available in a wide variety of sizes and types to meet the needs of any application. Flexitallic Gaskets are the only gaskets that are guaranteed to leak-free service for a long life.

Flexitallic SPIRAL-WOUND GASKETS

Flexitallic Gaskets are the only gaskets that are guaranteed to leak-free service for a long life. They are made of a special material that is designed to withstand the most severe conditions of service. They are available in a wide variety of sizes and types to meet the needs of any application.
