SUBJECT: PCB Transformer
Warson Warehouse

REFERENCE:

TO : Orville Mueth (AA3D)

The analysis for PCB's in the transformers stored at Warson Warehouse have shown that the Uptegraff transformer contains PCB's. The two GE's do not contain PCB's and can be disposed of per normal procedures.

Attached is a TSA for the moving of the PCB containing transformer to the Waste Staging Area near W Building. Please approve it and advise me on the procedure for transporting the transformer.

R. J. Edwards
