Robert A. Kehoe, M.D.
Laboratory of Applied Physiology
University of Cincinnati
Cincinnati, Ohio

Dear Doctor Kehoe:

This will acknowledge your letter of November 6.
My primary reason for communicating with Dr. Crudgington
was the fact that a friend of mine, Carl Anderson, General
Service Manager of the Packard Motor Car Company in New York
City claimed he had been advised by medical men, who have
examined their employees, that they had a lot of Ethyl poison
in their systems, and were gradually building up an immunity.

In fact, according to their statement, they had enough
Ethyl in them to "kill a horse."

I have referred your letter to Mr. Anderson, and in
all probability he will get in touch with you direct.

May I take this opportunity to thank you for the prompt
interest you have shown in this problem?

Yours very truly,

MILLS PETROLEUM CORPORATION

J. R. Deum
