

UNITED STATES GYPSUM COMPANY

PRODUCTS FOR RAILROADS

■ The United States Gypsum Company has been for thirty years a leader in the gypsum industry in this country. The original products manufactured by the company included practically all materials required for walls and ceilings of buildings.

The last five years have seen the United States Gypsum Company widen the scope of its activity in the building material field. New insulation plants, new roofing plants, a new hardboard factory, a new fibre board factory have been set up to make the USG line of building materials more complete.

Fifty mines, mills and warehouses assure exceptional distribution facilities. Twenty-three sales offices in important cities are assurance of adequate sales and service in all parts of the country.

Listed below are the main classifications of products manufactured by the United States Gypsum Company, all of which meet definite needs of railroads. Detailed descriptions of these and other products are contained in the Red Book of Building Materials, published yearly by the Company.
