DATE	December 19, 2003	
RE	ENVIRONMENTAL, HEALTH & SAFETY TRAINING GUIDELINES (Revision 4 Dated December 2002)	

The **Environmental, Health & Safety Regulatory Training Guidelines** for the Year 2003 have been developed and are attached for your use. There have been some changes made for the upcoming year as noted on the cover page. Also, you will note that we have also added regulatory references to each of the courses or programs. Once again, this training should be addressed and accomplished in a timely manner such that all training is completed by year's end 2003. Each unit is responsible for maintaining up to date records for all training.

If you have any questions or concerns, please contact either Ronnie Meyers or Bill Blair at your earliest convenience.
