Subject: No to GMO Mosquitos,

Good Afternoon Mrs. Beck,

Please let it known that I disagree with the policy allow a unknown and not indigenous species to be released is such a perfect environment we live in. I work outdoors all the time from The keys to Broward county and I fear for my health. If these mosquitos are to be ever released and I get any reactions and/or herpes I will be emailing and seeing you personally to make sure you see what you have caused not only to me but to the general public. I have read of the danger there is when these mosquitos have been released in Brazil & Jamaica.

I cannot believe you would infest our environment in that way. We have enough toxins, chemicals to worry about and now mosquitos with unknown genes and traits. Not acceptable.

Best Regards,

Ex. 6
