Subject: EPA Help - Navy Pier
[Navy Pier Redevelopment Summary.pdf](#)

Hi Millan,

Hope everything is going well. Wanted to reach out to see if you could help point a co-worker of mine in the right direction.

Allen Jamerson at the Bockorny Group represents Navy Pier in Chicago. Navy Pier is in the process of a major overhaul to modernize their infrastructure and facilities, part of this entails a number of sustainability projects. They have really become a shining star example of how to be a major attraction in a metropolitan area yet still achieve the highest level of sustainable goals.

I have provided you with a one-pager regarding their specific environmental achievements but my main question is whether or not there would be any federal EPA grant opportunities for an organization such as Navy Pier and if you have any thoughts about folks that would be willing to meet with an executive from Navy Pier next time they are in Washington? **Looking to see who we should be reaching out to on this topic.**

Thank you very much for your time!

Brad Hantler
