Mr. Sheldon S. Yates
Chicle Development Company
500 Fifth Avenue
New York City
New York

Dear Mr. Yates:-

Because of the interest in the rapid method for determination of "X" in chicle gum, we have prepared a description of the method with the essential details as to reagents and apparatus. We are sending the usual number of copies to you under separate cover in order that you may distribute them to those interested in the problem.

We have received your check covering the expenses of my trip to New York.

Very truly yours,

FT:is

Frederick Thomann
