intracompany memo

to	Mr. J. R. Hurd	location	Portland
from	Ed Sing	location	Acme
subject	<u>Monitoring for Asbestos Dust</u>	date	July 7, 1974

We have received your intracompany memo regarding monitoring for asbestos dust. If we could eliminate asbestos from our joint system products it would solve a lot of problems. I would like to point out that consideration should be given to the product that replaces asbestos, if any, that it does not create a problem that is as hazardous as asbestos.

Enclosed is a report from Mr. Jerry Lauderdale, received today, of a one sample test. As you can see the one sample was good, however to know we are in compliance I called Mr. Lauderdale and requested names of consultants in our area so that we might make an eight hour time weighted average. I will let you know more as we go along.
