

Employment History of Olin Jackson at Tyler Pipe Industries

1951-1959 Hired as a trainee in the fitting production department. Worked as a fitting molder's helper and as a fitting molder.

1959-1968 Promoted to line supervisor. During this period Tyler Pipe expanded rapidly allowing me the opportunity to work in a variety of production departments located in both the North and South Plant.

1968-1972 Promoted to Foundry Foreman of the first shift in the North Plant. The Foundry Foreman was responsible for supervising the entire operations of the foundry during a work shift. Later in this period I was transferred to the South Plant where I served in the same capacity.

1972-1975 Promoted to South Plant Superintendent.

1975-1987 Promoted to Director of Foundry Operations. This position entailed the management of all production operations in both the North and South Plants.

1987-1989 Promoted to Assistant Vice President of Foundry Operations. Same job, different title.

1989-1992 Assumed the job of Assistant Vice President-Director Of Research and Development.

1992-1995 Promoted to Vice President-Technology. Managed the Facilities Engineering, Tooling Engineering, Quality Assurance, Environmental, and Research and Development Departments.

1995 At the end of 1995 I retired from Tyler Pipe and am now doing a limited amount of consulting work. The consulting work consist of aiding foundries in modernizing their facilities, streamline operations, reducing rejects, increase quality, and improving the foundry environment and worker safety.

Education

Graduate of Tyler Junior College with an Associate Degree in Business Administration
