PLASTIC DRUM SAVER LIDS

During my recent visit to the Aberdeen Chemical Plant, attention was called to the availability of plastic drum saver lids, especially for 55 gallon drums which are stored outside in the weather. We would recommend that you consider using these in order to prevent corrosion and rusting of drum heads and to help preserve labels which are placed on the drum heads.

Orders may be placed with Charles Products Co., 415 North Poplar, P. O. Box 1906, South Hutchinson, Kansas, 67501.

Prices for 55 gallon drums:

1 to 9 = \$2.25 each
10 or more = \$2.00 each
50 or more = \$1.75 each

Prices for 5 gallon buckets:

1 to 10 = \$1.00 each
11 or more = \$0.90 each
150 or more = \$0.80 each
